Rate Information. The Annual Percentage Yield is a percentage rate that reflects the total amount of dividends to be paid on an account based on the dividend rate and frequency of compounding for an annual period. The Dividend Rates and the Annual Percentage Yields may change daily. The Dividend Rates and the Annual

Percentage Yields are the prospective rates and yields that the Credit Union anticipates paying for the applicable dividend period.

Nature of Dividends. Dividends are paid from current income and available earnings after required transfers to reserves at the end of the dividend period.

Compounding and Crediting. The compounding and crediting of dividends and dividend period applicable to the account are set forth in the Rate Schedule.

The Dividend Period is the period of time at the end of which an account earns dividend credit. The Dividend Period begins on the first calendar day of the period and ends on the last calendar day of the period.

Accrual of Dividends. Dividends will begin to accrue on noncash deposits (e.g. checks) on the business day you make the deposit to your account.
